

BUSINESS TECHNOLOGY

AI & AUTOMATION

Less busywork. More time for people.

Explore practical ways to connect your tools and simplify everyday work.

01 Customer conversations

Discuss a sales assistant or AI receptionist with a clear human handoff.

02 Connected workflows

Reduce repetitive steps across enquiries, follow-ups, and your business tools.

03 Clear boundaries

Agree on what an assistant can do, what it can access, and when a person steps in.

LET'S TALK

BUSINESS TECHNOLOGY

AI & AUTOMATION / HOW WE START

A conversation first.

A quote approved by a person.

01 Tell us what you need

Share your business, current setup, priorities, and preferred way to reach you.

02 Review a practical scope

We can discuss general planning ranges. A CORE team member reviews the details and approves the exact written quote.

03 Choose your next step

Review your approved quote and decide how to proceed. An enquiry or planning estimate does not start a payment.

HOSTING & CARE

CORE-hosted websites require hosting, starting at \$60/month. Care plans are optional and recommended. Choose hosting only or discuss the extra support you want.
