

BUSINESS TECHNOLOGY

BUSINESS TECHNOLOGY

Your business. Connected by CORE.

One conversation about the website, tools, and technology your business needs.

01 Websites & hosting

Custom websites, domain planning, and hosting starting at \$60/month.

02 AI & automation

Sales assistants, receptionists, integrations, and practical business workflows.

03 Visibility & support

SEO planning, remote IT support, and ongoing care when you choose it.

BUSINESS TECHNOLOGY

BUSINESS TECHNOLOGY / HOW WE START

A conversation first.

A quote approved by a person.

01 Tell us what you need

Share your business, current setup, priorities, and preferred way to reach you.

02 Review a practical scope

We can discuss general planning ranges. A CORE team member reviews the details and approves the exact written quote.

03 Choose your next step

Review your approved quote and decide how to proceed. An enquiry or planning estimate does not start a payment.

HOSTING & CARE

CORE-hosted websites require hosting, starting at \$60/month. Care plans are optional and recommended. Choose hosting only or discuss the extra support you want.
