

BUSINESS TECHNOLOGY

REMOTE IT SUPPORT

Technology help. Without the runaround.

Talk through the technology issues slowing your business down.

01 **Everyday troubleshooting**

Get help planning the next step for supported devices, software, and accounts.

02 **Business setup**

Discuss email, access, workflows, and the tools your team uses each day.

03 **A clear scope**

Availability, access, and the work involved are reviewed before a quote is approved.

BUSINESS TECHNOLOGY

REMOTE IT SUPPORT / HOW WE START

A conversation first.

A quote approved by a person.

01 Tell us what you need

Share your business, current setup, priorities, and preferred way to reach you.

02 Review a practical scope

We can discuss general planning ranges. A CORE team member reviews the details and approves the exact written quote.

03 Choose your next step

Review your approved quote and decide how to proceed. An enquiry or planning estimate does not start a payment.

HOSTING & CARE

CORE-hosted websites require hosting, starting at \$60/month. Care plans are optional and recommended. Choose hosting only or discuss the extra support you want.
